The application has been amended as follows:

### IN THE CLAIMS

1-11. (Cancelled)

12. (Currently Amended) A mobile phone comprising:  
a transmitter for transmitting blocks of digital data, the transmitter comprising  
radio transmitter circuitry and processing means, the processing means including  
a memory storing data representing a set of processing manners, said data  
defining a block size and a transmission time therefor for each processing  
manner, wherein the processing means is configured to:  
process at least one data flow, the or each data flow being processed  
according to manners selected from said set of processing manners;

concatenate data from the or each data flow and a code identifying said  
selected manner or manners to produce a block of concatenated data;  
interleave said block; and  
transmit said block,  
wherein the depth of said interleaving corresponds to a transmission time  
not greater than the least of said defined transmission times.

13. (Currently Amended) A transmitter according to claim 12, wherein said defined  
transmission times are integer multiples of the transmission time corresponding to said  
interleaving depth.

Deleted: claim 11

14. (Currently Amended) A transmitter according to claim 12, including a receiving means  
for receiving a signal defining said set of processing manners

Deleted: claim 11

16. (Currently Amended) A transmitter according to claim 12, wherein each processing  
manner includes an interleaving process definition.

Deleted: claim 11

18. (Cancelled)

19. (Cancelled)

20. (Currently Amended) A base station for a mobile phone network comprising:  
a transmitter, for transmitting blocks of digital data, the transmitter comprising  
radio transmitter circuitry and processing means, the processing means including  
a memory storing data representing a set of processing manners, said data  
defining a block size and a transmission time therefor for each processing  
manner, wherein the processing means is configured to:

Deleted: including

Deleted: according to claim 12

process at least one data flow, the or each data flow being processed according to manners selected from said set of processing manners;  
concatenate data from the or each data flow and a code identifying said selected manner or manners to produce a block of concatenated data;  
interleave said block; and  
transmit said block,  
wherein the depth of said interleaving corresponds to a transmission time not greater than the least of said defined transmission times.

21-22. (Cancelled)

23. (Currently Amended) A method of operating a mobile phone, comprising:  
transmitting a block of digital data using radio transmitter circuitry, said  
transmitting comprising:

Deleted: the method

establishing data representing a set of processing manners, said data  
defining a block size and a transmission time therefor for each processing  
manner,  
processing at least one data flow, the or each data flow being processed  
according to manners selected from said set of processing manners;  
concatenating data from the or each data flow and a code identifying said  
selected manner or manners to produce a block of concatenated data;  
interleaving said block; and  
transmitting said block,

Art Unit: 2617

wherein the depth of said interleaving corresponds to a transmission time not greater than the least of said defined transmission times.

29.-30. (Cancelled)

31. (New) A method of operating a base station for a mobile phone network, comprising:

transmitting a block of digital data using radio transmitter circuitry, said

transmitting comprising:

establishing data representing a set of processing manners, said data

defining a block size and a transmission time therefor for each processing manner,

processing at least one data flow, the or each data flow being processed

according to manners selected from said set of processing manners;

concatenating data from the or each data flow and a code identifying said selected manner or manners to produce a block of concatenated data;

interleaving said block; and

transmitting said block,

wherein the depth of said interleaving corresponds to a transmission time not greater than the least of said defined transmission times.

[End Amendment]

Art Unit: 2617

2. Therefore claims 12-17, 20, 23-28, 31 are allowed and renumbered as 1-14 respectively.
3. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach or suggest the limitations of the claims with the reasons set forth in the applicant's response filed on 9/23/2010. The rejection of previously presented claims has been withdrawn.
